Clearing the Air on Air Filters in Built Environments

Review of types of air filters, efficiency rating and their effectiveness against virus bacteria, molds, particulate, and odors. Best selection methods, maintenance and cost of ownership.

- Understand terminology and efficiency rating system (MERV)
- How to select filters for each application.
- What factors impact total cost of ownership for air filters.

Presented by: Richard Carrow, Filtration Sales Manager, John W. Danforth Co.

12:15pm-12:45pm

Basics of Green Walls Inside and Outside

Learn about the basic systems, installation, lighting and watering options for inside and outside.

- Environmental Considerations.
- Design Considerations.
- Maintenance Considerations.

Presented by: Kathryn O'Donnell, Green Wall Maven, Botanicus Interior Landscaping

1:15pm-2:00pm

Overcome Building Management Challenges by Leveraging Technology & Big Data

The facilities management industry is highly fragmented leading to inefficiency, increased expenses and downtime. Owners, operators and service providers can leverage technology and data analytics to overcome challenges saving time and money while increasing ROI.

- Building management is comprehensive - Identify your challenges and how to put tech to work for you solving them.
- Maximize revenue and efficiency as a service provider and/or equipment manufacturer in the new economy.
- Simplify building management for owners, operators and managers by aggregating data, tools and vendors.

Presented by: Jon DeWald, HELIXintel

2:30pm-3:00pm

Managing a Smooth Transition from Remote Work Back to Office Space

Learn about the benefits of concrete leveling to ensure the safe return of remote workers as they walk back into the workplace.

- Save budget dollars vs. replacement.
- Limit liability by reducing slip, trip, fall incidents.
- Reduce downtime with immediate use of repaired areas.

Presented by: Nicole Easton, A-1 Concrete Leveling
